

RevenueSense

Current Transformers (600V)

RevenueSense™ Current Transformers offer electrical utilities both extended range and high accuracy to reduce electrical losses and increase revenue metering accuracy.

Application

RevenueSense wide range, high accuracy CTs are designed for commercial and industrial applications. RevenueSense substantially reduces inventory, complexity and improves standardization for meter shop operations, particularly when used with GE's kV2c FITZALL™ transformer rated meters.

- JCT-0S, 6A to 1200A, 2" Window, Indoor/Outdoor
- JAK-0S, 6A to 1800A, 3" Window, Indoor/Outdoor
- JAB-0S, 10A to 4000A, 4.5" x 3.5" Window, Indoor/Outdoor
- JAD-0S, 12A to 4500A, 5.75" Window, Indoor/Outdoor

Features

- High precision metering that results in maximum billing accuracy
- Specialized amorphous core material provides minimal electrical core losses
- Maintains 0.15 high accuracy class from 1% of rated current, up through its rating factor

Benefits

- Increases billing accuracy
- Exceeds accuracy range for standard revenue metering
- Simplifies CT selection and billing multipliers
- Reduces inventory and part number requirements
